October, 2022

Description:

It is a special system for opening bank operations that have been opened by adding users, clients transactions, Checking Account, Loan Services and other operation in order for the bank to be able to monitor special operations.

In addition to that, a special interface for clients in order to be able to view their account information, manage financial transfers

Services Bank System:**Checking Accounts**

Checking accounts are deposits used by consumers and businesses to pay their bills and make cash withdrawals. They pay little or no interest and typically come with monthly fees, usage fees, or both.

Today's consumers generally have their paychecks and any other regular payments automatically deposited in one of these accounts.

Savings Accounts

Savings accounts pay interest to the depositor. Depending on how long account holders hope to keep their money in the bank, they can open a regular savings account that pays a little interest or a certificate of deposit (CD) that pays a little more interest. The CDs can earn interest for as little as a few months or as long as five years or more.
